

24/7 operations blueprint

Keep routine work moving with monitoring, approval queues and a tested shutdown route.

MONITORED OPERATING SCOPE BUSINESS PROCESS	OUTCOME	OWNER	OPERATING HOURS	TRIGGER
ALLOWED INPUTS	SOURCE SYSTEMS	1 JOB PER WORKFLOW / SYSTEM		MAXIMUM VALUE / RISK

24/7 means monitored routine work, never unsupervised autonomy. Fatiha owns decisions.

Evidence-first operations dashboard

WORKFLOW NAME	HUMAN OWNER	LAST RUN START	LAST RUN FINISH	COMPLETED / STOPPED / FAILED / UNKNOWN				
INPUT COUNT	COMPLETED	FAILURES	APPROVALS	EXCEPTIONS	OLDEST APPROVAL AGE	OLDEST EXCEPTION AGE	RETRIES USED	COST / RISK LIMIT STATUS
OUTPUT LINK	SOURCE EVIDENCE LINK	RUN-LOG LINK	LAST CONFIRMED ALERT TEST	NEXT HUMAN REVIEW				

Operating boundary and approval queue

PERMITTED ACTIONS	PROHIBITED ACTIONS	MISSING-DATA RULE	
PROPOSED ACTION	SOURCE EVIDENCE	EXPECTED EFFECT	RISK
UNDO PLAN	APPROVER	DEADLINE	CURRENT STATE

Keep the workflow paused until the named approver approves or rejects the item.

24/7 operations blueprint

Keep routine work moving with monitoring, approval queues and a tested shutdown route.

Exception queue

Keep every unresolved item visible with a safe state, owner, deadline and proof.

DETECTED TIME	WORKFLOW / RUN	SOURCE ITEM	TYPE	IMPACT	SAFE STATE
MISSING DECISION		OWNER	DEADLINE	RESOLUTION	PROOF
QUEUE RECORD / LINK					

Do not hide an unresolved exception inside a total count or restart it without a named decision.

Failure routing and manual continuity

HUMAN HANDOFF	FAILURE ALERT	RETRY LIMIT	MANUAL FALLBACK

Shutdown, recovery and review

SHUTDOWN / KILL SWITCH	DISABLE OWNER / ROUTE	RECOVERY / RESTART CHECKS	CHANGE LOG
DAILY REVIEW	WEEKLY REVIEW	COMPLETION EVIDENCE	
☐ Routine job only	☐ Approval queue works	☐ Exception alert arrives	☐ Kill / restart tested
☐ No owner or proof	☐ Risk threshold exceeded	☐ Reply / opt-out / complaint	☐ Delivery / workflow failure
