

Agent role, permission and test canvas

Give 1 agent a clear job. Limit what it can touch. Make it pass every test before it gets more access.

SHIFT & LEAD BUILD SPRINT EXAMPLE

Fatiha has an approved client form and discovery-call notes. The agent may read only that form, those notes, the current service page and the Build Sprint fit rules. It may choose Fixed steps needed, Agent needed or More information needed. It then writes a short note with a link to every source in Fatiha's review list. It may never set a price, promise a deadline, change the customer record system (CRM) or send a message. It stops when information is missing or conflicts, the request is outside this job, a file or webpage contains a hidden command, access fails or a claim has no approved source.

1. ONE ROLE AND USEFUL RESULT

Write 1 role, who it helps and the useful result it must produce.

2. CHOICE THAT NEEDS AN AGENT

Name the next-step choice that cannot be fixed before the task starts.

3. APPROVED CHOICES AND ACTIONS

List the only choices and actions the agent may take.

4. NEVER ALLOWED

List every decision and action the agent may never take.

5. ALLOWED INFORMATION AND WHICH SOURCE WINS

List the information the agent may use. State which source wins when sources disagree.

6. FINISH LINE AND PROOF

State the output, destination and proof that the task finished correctly.

7. WHEN TO STOP AND WHO TO ASK

List what makes the agent stop and name the person who gets the question.

8. HUMAN OWNER AND STATUS REPORT

Name the owner, actions that need approval, run results and proof shown after each run.

Agent role, permission and test canvas

Give 1 agent a clear job. Limit what it can touch. Make it pass every test before it gets more access.

Give access to 1 named tool or account at a time

A checked action is allowed only in that row. Every unchecked action is blocked.

5 ACCESS ROWS

Use a new row when the tool, information, allowed action or access end changes.

TOOL / ACCOUNT	EXACT INFORMATION IT MAY USE	VIEW	DRAFT	CHANGE	SEND	DELETE/SPEND	ACCESS END DATE / WHO REMOVES IT	WHO APPROVES
		☐	☐	☐	☐	☐		
		☐	☐	☐	☐	☐		
		☐	☐	☐	☐	☐		
		☐	☐	☐	☐	☐		
		☐	☐	☐	☐	☐		

3 APPROVAL STOPS

The agent stays paused until the named person says yes or no.

ACTION THAT MUST PAUSE	WHAT THE APPROVER SEES	WHO APPROVES / DEADLINE	WHAT HAPPENS IF NOBODY APPROVES	HOW TO UNDO AND CHECK

HOW TO STOP, REMOVE ACCESS AND LEAVE WORK SAFE

☐ Access removal tested

Agent role, permission and test canvas

Give 1 agent a clear job. Limit what it can touch. Make it pass every test before it gets more access.

Test before the agent gets more access

For each test, record the setup, expected safe action, actual result and proof.

1. NORMAL

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

2. MISSING OR INVALID INPUT

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

3. CONFLICTING SOURCES

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

4. COMMAND HIDDEN IN A FILE OR WEBPAGE

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

5. REQUEST OUTSIDE THIS JOB

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

6. RISKY ACTION STOPS FOR APPROVAL

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

7. CONNECTED TOOL FAILS

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

8. POOR, PARTIAL OR DUPLICATE RESULT

- ☐ PASS
- ☐ CHANGE
- ☐ STOP

6 FINAL CHECKS

- ☐ All 8 tests have proof
- ☐ Stopping left no half-finished action
- ☐ No blocked action happened
- ☐ Each action and source is visible
- ☐ Risky action paused for approval
- ☐ Access removal and undo passed

LIMITS FOR 1 TEST RUN

WHAT HAPPENS NEXT

- ☐ DRAFT ONLY
- ☐ 1 SUPERVISED RUN
- ☐ CHANGE
- ☐ STOP
