

Prompt builder and answer-quality scorecard

Brief 1 real task, score the answer and decide whether to Use, Revise or Stop.

shiftandlead.com/guides/better-prompts-and-answers.html

Write the brief before you run the task

Complete all 9 fields. Use task-specific information. If a field is unclear, the brief is not ready.

After the answer arrives, score it before you revise, send, publish or use it for a decision.

1. TASK AND FINISHED RESULT

What must AI prepare? What must be true when the work is finished?

2. AUDIENCE AND DECISION

Who will use the answer? What decision or action must it support?

3. CONTEXT THAT CHANGES THE ANSWER

Add only background that changes the result.

4. EVIDENCE AND SOURCE PRIORITY

Name allowed sources. If 2 sources conflict, state which source wins.

5. QUALITY EXAMPLE

Add 1 allowed example or describe what a strong result contains.

6. REQUIRED FORMAT

State sections, order, length, table columns or file type.

7. RULES, LIMITS AND CLAIMS TO AVOID

State what AI must not invent, expose, promise or decide.

8. MISSING-INFORMATION RULE

Tell AI to ask, mark the gap or stop when information is missing.

9. HUMAN APPROVAL POINT

Name who checks the answer and what action needs approval.

Prompt builder and answer-quality scorecard

Brief 1 real task, score the answer and decide whether to Use, Revise or Stop.

SHIFT & LEAD BUILD SPRINT WORKED EXAMPLE

Job: answer whether the Build Sprint includes strategy, implementation or both. Evidence: current service page and scope template.
Rules: under 120 words. No new deliverables, deadlines, guarantees or prices. Fatiha checks every promise and sends the reply.
1st score: 8. Evidence scored 0 because AI invented a turnaround time, so the answer stopped. Revised score: 11 after correction and source checks.

Answer-quality scorecard

Choose 0, 1 or 2 for every area. Name the weak area before changing the brief.

TASK FIT Does it complete the named job?	☐ 0 Fails ☐ 1 Partly ☐ 2 Passes	EVIDENCE Can each important claim trace to an allowed source?	☐ 0 Fails ☐ 1 Partly ☐ 2 Passes
COMPLETENESS Is every required part present?	☐ 0 Fails ☐ 1 Partly ☐ 2 Passes	RULES AND LIMITS Does it follow every stated rule and limit?	☐ 0 Fails ☐ 1 Partly ☐ 2 Passes
USABILITY Is it in the required format and ready for review?	☐ 0 Fails ☐ 1 Partly ☐ 2 Passes	UNCERTAINTY Does it show gaps, guesses and uncertain claims?	☐ 0 Fails ☐ 1 Partly ☐ 2 Passes

Total decision

TOTAL / 12

☐ USE ☐ REVISE ☐ STOP

10-12: USE after the named human check.
7-9: REVISE the weak area, then score again.
0-6: STOP and rebuild the brief or source.

AUTOMATIC STOP OVERRIDES THE TOTAL

- ☐ Important claim has no allowed source
- ☐ Private information is exposed or not allowed

NAMED HUMAN CHECK

- ☐ Sources conflict and no source wins
- ☐ Action would happen without human approval
- ☐ Important claims checked against original sources
- CHECKER
