

Workflow or agent worksheet

Choose 1 real task. Use the lowest level of freedom that can do it safely.

1 Choose the level

Start at 1. Move right only when the task needs more freedom.

REAL TASK

☐ 1. Chatbot

You need 1 answer, draft, summary or comparison. A person decides what happens next.

☐ 2. Workflow

You can write every step, the trigger and the finish before the task starts.

☐ 3. Agent with approval

AI chooses between approved actions. A person approves each action before it happens.

☐ 4. Agent allowed to act

Tests pass, the action is easy to reverse and a mistake costs little. Limits and logs are required.

When in doubt, choose the workflow. Require approval until access, results and failures are understood.

2 Answer 4 questions

Tick yes or no. Write the access, approval or next step beside it.

SHIFT & LEAD SCENARIO

Shift & Lead uses a workflow to deliver a requested guide. If a reader sends an unusual reply, an agent may prepare a response from the approved guide library, but a person approves it before send.

1 Can you write every step before the task starts?

☐ Yes ☐ No

2 Can you name the smallest access the task needs?

☐ Yes ☐ No

3 Could a wrong action affect money, customers, private data, rights or reputation?

☐ Yes ☐ No

4 Can you test the result, undo the action and see what the agent did?

☐ Yes ☐ No
