

4-week AI improvement tracker

Use 20 attempts on 1 real task. Keep only the rules the evidence supports.

Start after you have 1 checked low-risk result. Keep the same kind of task for all 20 attempts.
Change 1 instruction, source choice or check at a time. Keep customer, money, rights, access and lasting changes behind human review.

SHIFT & LEAD WORKED EXAMPLE

Task: write accurate guide-card promises. The first result said a Beginner would master prompting. The guide did not support that claim.

Fatiha changed 1 instruction: name a concrete reader action. She checked the next promise against the published guide before keeping the rule.

4-week AI improvement tracker

Use 20 attempts on 1 real task. Keep only the rules the evidence supports.

Week 1 • Attempts 1 to 5 • Attempt before looking

Use 5 new examples. Make the key decisions before opening the previous finished answer.

Score: 1 unusable - 2 mostly wrong - 3 usable with edits - 4 reliable with minor edits - 5 ready after human review
