

Kimi long-file and coding test brief

Run the same bounded task in Kimi and the tool you already use.

CHOOSE 1 TEST

☐ Long file

☐ Code

☐ Kimi assistant

☐ Kimi Work

☐ Kimi Code

CURRENT COMPARISON TOOL

SHIFT & LEAD TEST

Long file: ask the same 5 questions, require page or section references and score 10 claims. Code: use a solved issue on a separate branch, limit changed files, run tests and inspect the diff.

1

Task and finish line

Name the known file question or solved code issue and what a correct result must contain.

2

Allowed sources

List every file, folder, site or repository allowed, plus anything the tool must not open or change.

3

Identical brief

Use the same input, output format, limits and checks in Kimi and the current tool.

4 / COMPARE THE FINISHED RESULTS

KIMI RESULT

CURRENT TOOL RESULT

Source fidelity and references		
Editable final file or code change		
Factual errors or failed tests		
Correction work and time		
Unexpected action or maintenance		

5 / DECISION FOR THIS TESTED TASK

Keep Kimi only when it solves a named gap better, with acceptable access, correction work and maintenance.

☐ Keep Kimi for this gap.

☐ Retest with tighter limits.

☐ Do not add Kimi.
