

Manus task and permission map

Write the boundary, approval and stop before the agent runs.

Shift & Lead

THE AI AUTOMATION QUEEN

shiftandlead.com/guides/manus.html**MARK EVERY MANUS SETUP NEEDED**

☐ Agent mode ☐ Cloud browser ☐ Browser Operator

GOAL IN 1 SENTENCE**SHIFT & LEAD EXAMPLE**

Research a public guide topic into a source table. Name the allowed domains and required columns. Leave a row blank when the primary source cannot be verified, then check every link.

1 Finish line

Write the final deliverable, required evidence, person who checks it and pass rule.

2 Tools and data

Name every site, file, account, connected tool and data item the task needs.

3 Allowed actions

List what Manus may do and what it must not open, change, send, publish, buy or delete.

4 Approval checkpoint

Name the person and exact step before any send, publish, purchase, deletion or lasting change.

5 Stop conditions

Write the source, access, cost, run or uncertainty condition that must stop the agent.

6 Log and rollback

Name the log, run limit, rollback steps, restore point and date access will be removed.

7 / CHOOSE 1 RUN STATUS

Run only when the finish line, access, approval, log, cost limit, stop condition and rollback are written.

☐ Ready for 1 visible, reversible run. ☐ Research or draft only. ☐ Not ready. Do not run.
